

WILD BILL'S DESERT GARDEN

Saturday, May 13th 8am - 11am

(Address will be emailed the week of the tour)

Wild Bill has invited TCSS members and their guests back to see his newly added plantings and hopefully some May blooming specimens. He has spent over 20 years putting together his collection of cactus and succulents along with a variety of whimsical garden art and artifacts. He enjoys combining many of his collections in rock lined raised beds. Of special interest are his five boojum specimens. He says his property reminds him of Southwest Indian ruins and he and his best friend Odey are anxious to show you around.
