- Raffle
- Origin: Mexico (Baja California)
- Min temp: to 14 deg F
- Usually solitary
 - Stem diameter: to 24 in
 - Height: to 3 ft
- Propagated from seed
- Full sun
- Well-drained soil

Agave ovatifolia

- **Raffle Plant**
- **Origin: Mexico**
- **Min temp: to 14 deg F**
- **Solitary**
 - **Diameter: to 6 ft**
 - **Height: to 5 ft**
- **Described by Greg Starr**
- **Propagated from seed**
- **Full sun**
- **Water when dry during warm weather**
- **Well-drained soil**

Grusonia stanlyi

- **Raffle**
- **Origin: USA (Arizona), Mexico (Sonora)**
- **Min temp: to 14 deg F**
- **Has terminal flowers**
- **Forms rambling mat**
 - **Stem height: to 10 in**
 - **Stem diameter: to 1.5 in.**
- **Propagated by seed, offsets**
- **Full sun**
- **Water when dry during warm weather**
- **Well-drained soil**

Portulacaria afra 'Kaleidoscope'

- Raffle
- Origin: South Africa
- Min temp: to 25 deg F
- Cultivar
- Forms multi-stemmed shrub
 - Diameter: to 3 ft
 - Height: to 3 ft
- Full / filtered sun
- Propagated from seed, cuttings
- Water when dry during warm weather
- Use highly porous, well-drained soil

Echinocereus triglochidiatus var triglochidiatus

- Raffle
- Origin: USA (Arizona, Colorado, New Mexico)
- Min temp: to 14 deg F
- Uncommon variety with sparse spination
- Forms cluster
 - Stem diameter: to 3 in
 - Height: to 1 ft
- Propagated from seed
- Full / Filtered sun
- Well-drained soil

Myrtillocactus cochal forma cristata

- Raffle
- Origin: Mexico (Baja California)
- Min temp: to 25 deg F
- Grows more slowly and is more uncommon than *geometrizarans*
- Uncrested version grows in 'candelabra clusters' 10 ft x 10 ft

'Silver Dollar Vine'

- Raffle
- Origin: Madagascar
- Min temp: protect from frost
- Forms climbing vine
 - Length: to 6 ft
 - Diameter of leaf: to 1½ in
- Propagated from offsets
- Filtered sun
- Well-drained soil

DOOR PRIZES

Pick up ticket as you enter

Must have your name tag

Oreocereus trollii

‘Old Man of the Andes’

- Door Prize
- Origin: Bolivia, Argentina
- Min temp: to 14 deg F
- Habitat: Arid mountains to 13,000 ft
- Forms chunky clustered columns
 - Diameter per stem: to 6 in
 - Height: to 2 ft
- Propagated from seed or offsets
- Full / Filtered sun
- Water when dry during warm weather
- Well-drained soil

Synadenium grantii

- Door prize
- Origin: East Africa
- Min temp: Protect from frost
- Euphorbia family / has toxic sap
- Mostly solitary stems
- Will branch as it gets taller
 - Grows 2 – 3 feet in one season
 - Ultimate size 15 – 20 feet
- Roots easily from herbaceous or woody stem cuttings
- Filtered sun
- Water when dry during warm weather
- Use well-drained soil

Mammillaria melanocentra

- Door Prize
- Origin: Mexico (Coahuila, Durango, Tamaulipas, Nuevo Leon)
- Min temp: to 14 deg F
- Solitary
 - Height: up to 4 inches
 - Width: up to 6 inches
- Propagated from seeds
- Full / Filtered sun
- Water when dry during warm weather
- Well-drained soil

Aloe hybrid 'Nobilis'

- Door Prize
- Origin: South Africa
- Hardy to 25 deg F
- Forms clusters
 - Rosette diameter: to 6 inches
 - Height: up to 24 inches
- Propagated from offsets
- Full / Filtered sun
- Water when dry during warm weather
- Well-drained soil

Ferocactus alamosanus

- Door Prize
- Origin: Mexico (Sonora)
- Min temp: protect from frost in colder areas
- Species threatened in habitat
- Usually solitary
 - Height: to 3 ft
 - Diameter: to 14 in
- Propagated by seed
- Full sun

- Free plant
- Origin: South Africa
- Protect from frost
- Forms small shrub with hanging, curling stems
 - Width: up to 24 inches
 - Height: up to 14 inches
- Propagated from seeds, woody stem cuttings
- Filtered sun
- Water when dry during warm weather
- Well-drained soil

Ferocactus emoryi ssp covillei

- Free plant
- Origin: Mexico (Sonora); Arizona (Yuma, Maricopa Co)
- Min temp: to 14 deg F
- Usually solitary, forms heavy spines
 - Diameter: to 18 in
 - Height: to 2 ft
- Full sun
- Propagated from seed
- Water when dry during warm weather
- Use highly porous, well-drained soil

Sedum adolphii 'Sunstorm'

- Free plant
- Origin: Cultivar
- Min temp: protect from frost
- Forms clusters of stems
 - Stem height: to 12 in
 - Stem diameter: to 2 in
- Propagated from seeds, cuttings
- Filtered sun
- Water when dry during warm weather
- Use well-drained soil

Albuca humilis

- Free plant
- Origin: South Africa (Eastern Cape); Namibia
- Min temp: protect from frost
- Forms clusters of bulbs
 - Height: to 6 in
 - Bulb width: to 1 in
- Filtered sun
- Propagated from offsets
- Water when dry during warm weather,
- Use porous, well-drained soil

Mammillaria laui

- Free plant
- Origin: Mexico (Tamaulipas)
- Min temp: protect from frost in colder areas
- Forms large clusters
 - Stem diameter: to 3 inches
 - Stem height: to 2 inches
- Propagated from seed, offsets
- Full / Filtered sun
- Water when dry during warm weather
- Well-drained soil

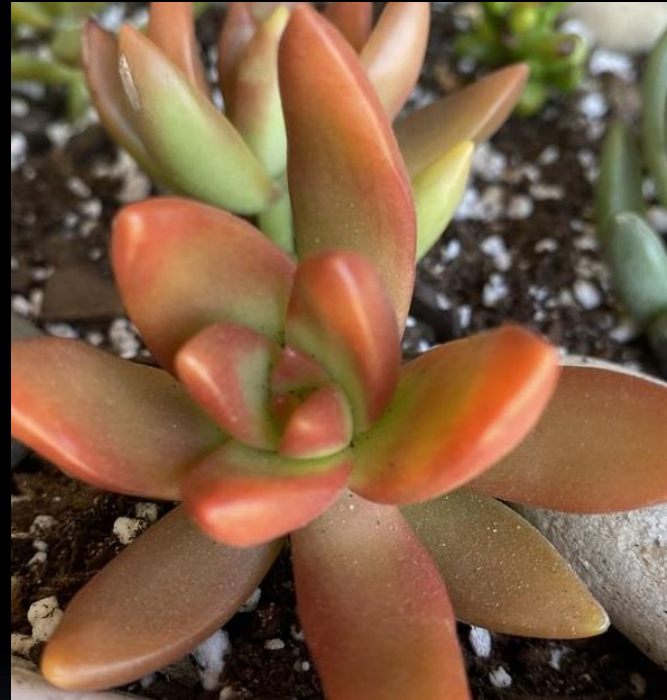

Astrophytum capricorne

- Free plant
- Origin: Mexico (Chihuahua, Coahuila)
- Min temp: to 14 deg F
- Spines serve as camouflage in grass
- Usually solitary
 - Stem diameter: to 6 in
 - Stem height: to 2 ft
- Propagated from seed
- Full / Filtered sun
- Water when dry during warm weather
- Well-drained soil

Sedum adolphii 'Sunset'

- Free plant
- Origin: Cultivar
- Min temp: protect from frost
- Forms clusters of stems
 - Stem height: to 12 in
 - Stem diameter: to 2 in
- Propagated from seeds, cuttings
- Filtered sun
- Water when dry during warm weather
- Use well-drained soil

Pleiospilus nellii

- Free plant
- Origin: South Africa (Eastern Cape)
- Min temp: protect from frost
- Forms small cluster
 - Stem diameter: to 2 in
 - Stem height: to 2 in
- Propagated from seed, offsets
- Full / filtered sun
- Water when dry during warm weather
- Well-drained soil

Echinopsis chamaecereus (‘Peanut Cactus’)

- Free plant
- Origin: Unknown (has not been found in the wild)
- Min temp: to 14 deg F
- Forms clumps
 - Stem diameter: to ½ in
 - Stem length: to 6 in
- Propagated from seed, offsets
- Filtered sun
- Water when dry during warm weather
- Well-drained soil

Thelocactus hexadrophorus

- **Free Plant**
- **Origin: Mexico (San Luis Potosi, Tamaulipas, Nuevo Leon, Zacatecas)**
- **Min temp: to 14 deg F**
- **Usually solitary**
 - **Stem diameter: to 8 in**
 - **Stem height: to 3 in**
- **Full sun**
- **Propagated from seed**
- **Water when dry during warm weather**
- **Use highly porous, well-drained soil**

Cotyledon hybrid

- Free plant
- Origin: South Africa
- Min temp: to 30 degrees F
- Forms succulent evergreen shrub
 - Height: to 20 in
 - Diameter: to 24 in
- Propagated from seed, cuttings
- Filtered sun
- Water when dry during warm weather
- Use well drained soil mix

Parodia magnifica

- **Free plant**
- **Origin: Brazil (Rio Grande do Sul)**
- **Min temp: to 14 deg F**
- **Yellow flowers**
- **May form clusters**
 - **Diameter: to 6 in**
 - **Height: to 18 in**
- **Propagated from seed**
- **Full / Filtered sun**
- **Water when dry during warm weather**
- **Well-drained soil**
